

CHARGE SMART, SAVE BIG

Reduce your home electricity costs with Greenworks Power's advanced battery solution. **No solar panels needed.** Our system stores low-cost energy during off-peak hours and uses it when rates are high, slashing your electricity bills.

Plug & Play Modular System with up to 5 batteries (5.1 to 25.1kWh), easily scalable for future needs.

ADD SOLAR LATER

Easily add solar panels later for even greater energy independence and savings.

5 REASONS WHY YOU SHOULD INVEST IN A HOME ENERGY STORAGE SYSTEM

UP TO 80% ELECTRICITY SAVINGS

Save 60% to 80% on your electricity bills, optimised by smart app usage and time-of-use tariffs.

PAYBACK IN JUST 6 YEARS

Expect a quick return on your investment, with payback in as little as 6 years.

SAVE UP TO £62,000 OVER 25 YEARS

Maximise your investment with significant returns over 25 years, boosted by lower costs and greater savings.

SUSTAINABLE ENERGY, SUSTAINABLE PLANET

Take charge of your electricity usage, reduce carbon intensity and make a real difference in protecting the environment. Together, let's power the future with clean, sustainable energy!

SAFEGUARD YOUR HOME

Keep your essentials like Wi-Fi, CCTV, security lighting, and fridge/freezer running smoothly during outages. Ensure your family's safety with an uninterrupted power supply when it matters most.

OVER 25 YEAR BATTERY LIFE EXPECTANCY*

*10,000 Cycles divided by 365 days a year is 27.4 years based on one cycle use each day

5 REASONS WHY YOU SHOULD CHOOSE OUR HOME ENERGY STORAGE SYSTEM

15 YEAR WARRANTY/10,000 CYCLES

Enjoy long-term peace of mind with our industry-leading 15-year warranty.

EXTENDED SYSTEM LIFE

Unlike other systems, our battery is designed for longevity with a projected life of over 25 years (based on one cycle per day).

OPTIMISED FOR TIME-OF-USE TARIFFS

Our system works seamlessly with time-of-use tariffs, ensuring maximum savings during low-rate periods. Example tariffs could result in even greater savings compared to other battery storage suppliers.

SAVE MORE AS ELECTRICITY PRICES RISE

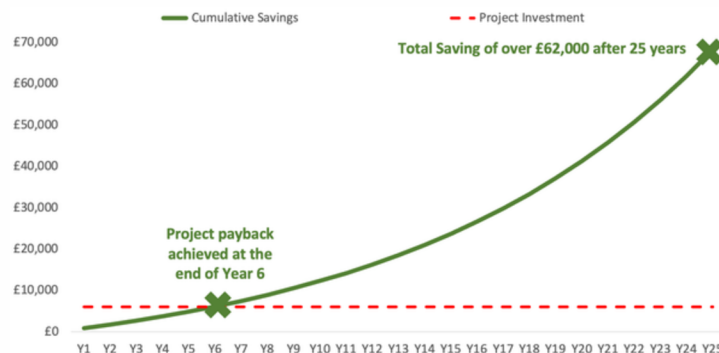

As energy prices continue to rise, our system's performance and savings grow, with our ROI model accounting for a 9% annual increase in energy costs.

MODULAR DESIGN

Future-proof with our Modular Design for 5.1kWh to 25.5kWh flexibility.

RETURN ON INVESTMENT

Pay back your investment in just 6 years, cut energy bills with time-of-use tariffs, and enjoy a strong return on investment.

Our electricity storage batteries charge at off-peak rates, cutting your cost from 28.98p to 6.9p per kWh with the Eon Next Drive Fixed V3 Tariff*.

This can **reduce your electricity bill by up to 77%**. With a 6-year payback, **your total ROI is £62,262 over 25 years**, factoring in a conservative 9% inflation rate.

*TARIFF EXAMPLE EON NEXT DRIVE FIXED V3 TARIFF AS AT 14/08/24
